

New Features

Proxy Support

If the internet can only be accessed via proxy server, this proxy server can now be made known to the module. This is done via the optional FirstSpirit parameter `inlinebrowser.httpproxy` or specifically for this module with the new parameter `videomanagement.httpproxy`.

You can find more information in our documentation „FirstSpirit™ VideoManagement“ in chapter 2.2.3 „Proxy-Support “.

Compatibility

Product	Version(s)	Notice
FirstSpirit	>= 4.2.437
