ARITHNEA

Release Notes

SocialWeb

Enables Web 2.0 features in FirstSpirit^{TM}

Version: 2.2.0
Date: 20. September 2017

Release Notes

The **SocialWeb** module allows the integration and evaluation of user comments and reviews directly in your FirstSpirit™ client. This document describes the module's new functions and changes since the last release.

SocialWeb Version 2.2.0

Changes

New: Notification menu icon for SiteArchitect

Activates a menu icon for notifications of when users write new comments. Links to a new table in the data sources listing all new comments.

New: Report from all of the new comments for ContentCreator

A list is displayed in ContentCreator to allow the editors to edit all comments in one place.

Change the captcha with Google reCAPTCHA

The new secure Google reCAPTCHA replaces the older implementation.

Fixed bugs and optimization for ContentCreator

ID	Role	Category	Subcategory	Description
1	All Users	Normal Usage	Deployed Pages	Previously, when using the **ContentCreator**, editors got an error when opening the SocialWeb comments from the data sources. Now everything is working properly. Further minor stabilization measures for the **ContentCreator**.

SocialWeb Version 2.1.273

Changes

Fixed bugs

ID	Role	Category	Subcategory	Description
1	All Users	Normal Usage	Deployed Pages	When you used the **template importer**, it imported the wrong section templates. This bug has been fixed

SocialWeb Version 2.1.270

Changes

Updated for FirstSpirit™ 5.1 and 5.2

The module has been updated to work with FirstSpirit™ version 5.1 and 5.2

ContentCreator

The module's functionality provided in the SiteArchitect (JavaClient) is now also available in the ContentCreator (WebClient).

Fixed bugs

ID	Role	Category	Subcategory	Description
1	All Users	Normal Usage	Deployed Pages	When a comment was rendered in the websites, line breaks were ignored. Now the comments are correctly formatted.
2	All Users	Normal Usage	Deployed Pages	It could happen in some cases that the captcha was invalidated before the check. This behavior has been fixed.

SocialWeb Version 2.0

Changes

Sort order

The comments and ratings tables can now be sorted by column in ascending or descending order.

Updated for FirstSpirit™ 5

The module has been updated to work with FirstSpirit™ version 5.

The configuration

The configuration was moved from the **Server and Project Configuration** to the **Project Settings** within the JavaClient.

Warning: MS SQL is no longer supported

The Database MS SQL Server has been removed from the list of supported databases.

No Comments on Comments

The feature to reply to comments was not stable and has been removed.

Fixed bugs

ID	Role	Category	Subcategory	Description
1	Administrator	Administration	Web Service	The compatibility with the database types MySQL, Oracle and PostgreSQL was fixed.
2	All Users	Normal Usage	Web Service	A UTF-8 encoding problem in the web service has been fixed.
3	Editor	Normal Usage	Deployed Pages	The whole JavaScript part was refactored.
